### [IMPROVED]
- ✓ remixbox is now 64-bit.

## Ver.2.1.0 (7 February, 2013 Update)
### [NEW]
- ✓ Ver.2.1.0 reflects REMIX-STATION 1000 Platinum Edition color on the GUI.

## Ver.2.0.0 (29 November, 2012 Update)
### [NEW]
- ✓ A new body color of pearl white for the GUI of REMIX-STATION1000-W became available.

## Ver.1.1.0 (13 November, 2012 Update)
### [IMPROVED]
- ✓ Supporting OS X Mountain Lion v10.8.

## Ver.1.1.0 (25 July, 2012 Update)
### [IMPROVED]
- ✓ A "beat selection box" has been added to the "sampler slot details window" of remixbox. If you select the number of beats from the dropdown menu, the sample's BPM and the playback end position are automatically calculated and displayed on the window.
- ✓ Sampled source volume can be adjusted by a newly added knob on the "sampler slot details window" of remixbox.
- ✓ GAIN of NOISE (SCENE FX) can be more finely adjusted.

## Ver.1.0.1 (25 April, 2012 Update)
### [FIXED]
- ✓ Problems concerning the display have been corrected.
- ✓ Problems concerning the sampler settings have been corrected.
- ✓ The problem of the undo/redo function not working for certain functions has been corrected.

- ✓ The problem of some keyboard operations not working properly has been corrected.
- ✓ The problem of the settings recall function not working properly has been corrected.

**[IMPROVED]**

- ✓ Sampled sound sources can now be copied on the sampler slot screen by dragging the mouse while pressing Ctrl.
